

This document contains:

- The Event Covid-19 risk assessment and risk mitigation plan in accordance with the [FEI Policy for Enhanced Competition Safety during the Covid-19 Pandemic](#)
- The Event Approved Schedule

Given the current covid-19 situation, please note that the FEI's approval of a Schedule should not be taken as an absolute guarantee that the Event will definitely go ahead. The decision whether the Event can take place must be made by the OC and NF in close consultation with the applicable domestic government and public health authorities. It is the responsibility of each Participant to check the status of the Event prior to planning his/her travel to the Event.

Guidance for the use of the WHO Risk Assessment tools in the context of COVID-19 - FEI version

Guidance for FEI Event organisers ("OCs") during the current outbreak of COVID-19

In view of the current outbreak of COVID-19, this disease-specific and event-specific risk assessment and mitigation checklist has been developed by WHO for use by host countries and event organizers, to assess the specific risk of COVID-19.

The FEI has slightly adapted the wording in the document, mainly by replacing the initial term "mass gathering sporting event" by "FEI Event".

Under the FEI Policy for Enhanced Competition Safety during the Covid-19 Pandemic, which applies to all FEI Events taking place after 1 July 2020, all OCs of FEI Events must carry out a risk assessment of their Event in terms of Covid-19 transmission, using the present document.

The following risk assessment and mitigation checklist should be used in conjunction with the "WHO Mass Gathering Sports Addendum Guidelines" - OCs should consider the term "mass gathering" in it as synonym of "FEI Event" in this context.

In order to accurately provide answers the following risk assessment and mitigation checklist, OCs must be knowledgeable on the current COVID-19 outbreak. OCs should reference the daily global COVID-19 situation reports provided by WHO as well as the national COVID-19 situation reports, if available.

The tool must be completed in this Excel spreadsheet (see following tabs), as the scores are automatically calculated there. Once the tool is completed, the scores received in the Excel spreadsheet for both sections will appear in the decision matrix found on the final tab ("Overall risk scores") for the Event's overall risk score to be determined.

It must be ensured that this risk assessment is conducted with input from local public health authorities and that the necessary personnel with expertise in mass gatherings, risk assessment, epidemiology, and infectious disease control measures are included from the initial stages of planning.

For the final determination, factors under consideration include:

- the current stage of the COVID-19 outbreak and known transmission dynamics
- the geographical distribution and number of participants, and their individual risk profile
- the risk assessment tool
- the mitigation measures that are currently in place or feasible and any discipline-specific guidance issued by the FEI.

It is important to remember that while mitigation measures can reduce the risk of COVID-19 infections, they cannot completely eliminate the threat. It is WHO's view that all countries with community transmission should seriously consider postponing or reducing sport events that bring people together and have the potential to amplify disease, and support the recommended best practice of physical distancing. Any decision will be supported through the use of WHO tools, in particular this risk assessment tool.

If movement restrictions and further national measures have been established in the country, the risk assessment does not apply.

However, when the process of re-opening/conducting mass gatherings is being considered post movement restrictions, it will be key to ensure any decisions are based on a risk assessment, such as the WHO Mass gatherings COVID-19 risk assessment.

Risk assessment for COVID-19

1

The questions below will enable OCs to review the additional considerations specific to sports, and thus inform their risk assessment of COVID-19 associated with their Event. This will help OCs understand and manage any additional risk from COVID-19.

The risk assessment should be reviewed and reassessed regularly during the planning phase and updated immediately prior to the transition to the operational phase, especially in light of the rapidly evolving nature of the outbreak. Reference should be made to the latest technical guidance and situation reports on the WHO website.

The risk assessment for COVID-19 associated with the Event must be coordinated and integrated with the host country's national risk assessment for COVID-19. The person completing the questionnaire should include input from the local public health authorities, consult WHO's latest technical guidance and ensure that there is an up-to-date evaluation of the epidemiological situation.

Please answer Yes (1) or No (0) to the following questions to determine a risk assessment score that incorporates factors specific to sporting events

Additional risk of COVID-19 to the sporting event	Yes (1)/No (0)	Score
Will the event be held in a country that has documented active local transmission of COVID-19 (community spread)?	1	1
Will the event be held in a single venue or multiple venues/cities/countries? <i>(single venue = 0; multiple venues = 1)</i>	0	0
Will the event include international participants (athletes and spectators) from countries that have documented active local transmission of COVID-19 (community spread)? <i>(NB: if the Events does not involve spectators, please clarify this in the comments to the questions in relation to spectators in the "Mitigation Checklist" sheet)</i>	1	1
Will the event include a significant number of participants (athletes or spectators) at higher risk of severe COVID-19 disease (e.g., people over 65 years of age or people with underlying health conditions)?	0	0
Will the event include sports that are considered at higher risk of spread for COVID-19 (eg, contact sports)?	0	0
Will the event be held indoors? <i>(Yes = 1; No = 0)</i>	0	0
Total COVID-19 risk score		2

Mitigation checklist for COVID-19

Mitigation measures assess the current effort and planning to reduce the risk of spread of COVID-19 disease for the event. As mitigation measures can reduce the overall risk of the sporting event contributing to the spread of COVID-19, they should be taken into account after the risk assessment has occurred to gain a clearer understanding of the overall risk of transmission and further spread of COVID-19, should the event be held. Together with the risk assessment score, the mitigation measure will contribute to the decision matrix and influence the assessment of the overall risk of transmission and further spread of COVID-19 in relation to the event.

Understanding of the overview of the current COVID-19 situation by the OC	Have the relevant OC and responsible staff been informed about the latest available guidance on the COVID-19 outbreak (official web resources available from WHO, CDC, ECDC, UN, local public health authorities)? And are the OC and staff concerned committed to following the available guidance?	2	1	2	
	Is the OC aware of global and local daily situation reports as provided by WHO or local public health authorities?	2	1	2	
	Do the OC and responsible staff understand the risks and transmission routes of COVID-19, the steps that Event attendees can take to limit spread, the recognized best practices (including respiratory etiquette, hand hygiene, physical distancing, etc.), and the travel restrictions adopted by different countries that may affect the Event?	2	1	2	
Event emergency preparedness and response plans	Has a contingency medical response plan for COVID-19 been developed for the Event?	2	3	6	
	Does the contingency medical response plan include information about how attendees should interact with the host country healthcare system (e.g. hotline/helpline telephone number, medical teams and first-aid points for the Event, local health care system)?	2	3	6	
	Is there an Emergency COVID-19 Outbreak Response Coordinator/Team in the OC or other structure for the Event with defined roles and responsibilities, coordinating the health preparedness and response planning for the outbreak?	2	2	4	
	Has the host country or OC requested support from WHO and/or local public health authorities ?	2	3	6	
	Has the OC acquired the following supplies to help reduce the risk of transmission of COVID-19?				
	Personal protective equipment (e.g. masks, gloves, gowns) for onsite medical personnel	2	3	6	
	Hand sanitizer and alcohol rubs/gels, tissues, frequently replaced soap canisters and closed bins for safe disposal of hygienic materials (e.g. tissues, towels, sanitary products) in washrooms and changing rooms	2	3	6	

Hand sanitizers and alcohol rubs for all entrances and throughout the venue	2	3	6	
If a person feels unwell/ shows symptoms of an acute respiratory infection during the Event:				
Is there a procedure for athletes or spectators to clearly identify whom to contact and how to do so if they or other Event participants feel unwell?	2	3	6	
Is there a protocol on whom the OC should contact in the host country to report suspected cases and request testing and epidemiological investigations?	2	3	6	
Are first-aid services or other medical services in-place and equipped to support patients with respiratory symptoms?	2	2	4	
Are there isolation rooms or mobile isolation units available onsite?	2	2	4	
Are there any designated medical facilities that manage patients with COVID-19 infection in the host country?	2	2	4	
Are there transportation services with trained medical professionals available to transport critically ill patients with severe acute respiratory infections to a hospital or to evacuate them from the host country, if necessary?	2	2	4	
Has a cleaning schedule been developed to ensure the venue is clean and hygienic – wiping surfaces and any equipment regularly with disinfectant is strongly recommended (before, during and after the event and between each round of competition)?	2	3	6	
Are there established screening measures , including temperature checks in place for participants at the point of entry, venues, routes and on-site medical facilities (first-aid points)? (Please specify in Comments what these screening measures include)	2	3	6	
Is the host country conducting COVID-19 laboratory diagnostic tests ? (If Yes, please specify in comments the type of COVID-19 diagnostic test used)	2	3	6	
Does the host country have a national public health emergency preparedness and response plan that can address severe respiratory diseases, including COVID-19?	2	2	4	
Is there a preliminary agreement by the host country to provide care for any COVID-19 cases connected with the Event?	2	3	6	
If the Event is for a duration of 14 days or longer, does the medical response plan for the event include resources and protocols for managing all public health interventions that would be necessary and supporting the national public health authorities if participants are infected and become unwell at the Event? (If the event is for less than 14 days, please score 0)	2	3	6	
If the Event is for less than 14 days, does the medical response plan include protocols for OCs to notify all participants of possible exposure to COVID-19 if the OCs are made aware of any suspected or confirmed cases that attended the Event? (If the event is for 14 days or longer, please score 0)	2	3	6	
Is there an established mechanism for collaboration and coordination between the health and security sectors , which is considered as crucial?	2	2	4	

Stakeholder and partner coordination	Are there agreed, clear and easily understood processes in place for reporting to external multi-sectoral stakeholders (including surveillance authorities, WHO, CDC, ECDC, etc.) and disseminating risk communication messages (Media)?	2	2	4	
Command and control	Is there a decision-making authority/body and an agreed procedure to modify, restrict, postpone or cancel the Event related to the evolving COVID-19 outbreak?	2	3	6	
	Are there arrangements to activate a strategic health operations centre if there are suspected COVID-19 cases in connection with the Event?	2	2	4	
	Have the OC and staff undergone training and exercises on personal safety procedures and emergency mitigation measures (including those specifically listed in this checklist)?	2	3	6	
Risk communication	Is there a risk communication strategy for the Event in regard to COVID-19?	2	3	6	
	Is there a designated person(s) to lead media activities and tasked with managing all external communications with national and international government officials, the general public, and the media? (If yes, please identify the spokesperson in comments)	2	2	4	
	Has there been monitoring of national and international media and social media established for rumours to be able to counter them early? (Please explain in the comments what protocols are in place for counter messaging)	2	2	4	
	Has coordination been set up with major official media channels and social media sites such as Twitter, Facebook and Instagram so that messaging can be coordinated with, and assisted by, the platforms to provide targeted messaging from OCs (including messaging to counter fake news and rumours, and proactive messaging about the status of the sporting event, including changes)?	2	2	4	FACEBOOK
Public health awareness of COVID-19 before and during the event	Has public health advice on clinical features of COVID-19, preventive measures, especially respiratory etiquette, hand hygiene practices, and physical distancing, been shared with all staff involved in the Event, athletes, the public, and personnel of all relevant stakeholders?	2	3	6	
	Has information on the at-risk populations been provided to all athletes, the public and others so they may make an informed decision on their attendance based on their personal risks?	2	3	6	
	Has public advice included information on the meaning of the following measures: quarantine, self-isolation and self-monitoring ?	2	2	4	
Surge capacity	Are there any surge arrangements in place in the event of a public health emergency during the Event - (i.e. suspected and confirmed cases of COVID-19?				
	Do these surge arrangements include funding for mitigation measures?	2	3	6	
	Do these surge arrangements include stockpiles of equipment (e.g. personal protective equipment, etc.)	2	3	6	
	Do these surge arrangements include training of extra staff?	2	2	4	
	Do these surge arrangements include volunteers?	2	2	4	
	Will there be daily health checks of athletes/competitors?	2	2	4	
	Will the athletes be separated from other groups , such as officials, support staff and spectators, to limit transmission?	2	2	4	DISTANCE 2 METERS-MASK

Specific mitigation measures	Are there measures in place to limit the sharing of equipment, water bottles, towels, etc. ?	2	3	6	
	Will athletes be given closed containers to allow for the safe disposal or storing of all hygienic materials (e.g. tissues, towels, etc.)?	2	3	6	
	Will the Event have designated seating for all spectators?	2	3	6	NO PUBLIC -CLOSED DOOR EVENT
	Does the designated seating provided allow for physical distancing between spectators (minimum of 1 metre)?	2	2	4	NO PUBLIC -CLOSED DOOR EVENT
	Have pre-travel health checks been performed on all athletes to ensure underlying co-morbidities, medications, allergies, etc. are documented?	0	2	0

Event overall risk score

The decision matrix takes the risk score and the mitigation score to provide a colour determination. This colour determination identifies the total risk of transmission and further spread of COVID-19 in relation to the Event. The "Colour Determination" key below the decision matrix describes the total risk for each colour.

COVID-19 EMERGENCY

ANTI-CONTACT SAFETY PROTOCOL - Endurance races of 13-14-15- NOVEMBER - AREZZO-Italy

Integration to the DVR-RISK ASSESSMENT DOCUMENT pursuant to art. 17, 28 and 29 of Legislative Decree 9 April 2008, N.81 and as amended

-President ASD GENERALI ENDURANCE Valentina Generali

- Responsible for the Health Protocol Giovanna Vivarelli

Biological risk assessment related to the sudden emergency linked to the spread of the SARS-CoV-2 virus (so-called "coronavirus"), the cause of Covid-19 disease

1. Purpose

Given that, in relation to the dangerous situations that have arisen in our country with the spread of COVID-19, with reference to the specific legislative provisions, and in particular to the Prime Ministerial Decree of 22 March 2020, Equestrian Endurance activity is classified with low risk , this document has been prepared in order to assess the biological risk related to the sudden emergency related to the spread of the SARS-CoV-2 virus for Generali endurance ASD in order to define a set of preventive and protective measures aimed at minimizing this risk for the event to be held in Arezzo – Equestrian Centre on 13-14-15 November .

That said, the ASD took steps to adopt all the necessary measures to ensure the contrast and containment of the spread of the new virus during the event , regulating it with this plan to make the event a "Safe place" where riders, the judging commission, the staff, compatibly with the limitations imposed by specific regulatory provisions, can practice the equestrian discipline of Endurance.

In this regard, all necessary precautions are provided which must be adopted for to counter the spread and contagion of COVID-19.

The contents of this document must be brought to the attention and acknowledged by anyone who will be authorized to enter the event indicated above

.2. Introduction

2.1. Generic aspects,

The World Health Organization (WHO) has announced on 11.02.2020 the new name for new coronavirus disease: Covid-19. The name stands for Co (crown); Vi (virus); D ('disease' and 19 (the year the virus was identified).

Coronaviruses are a large family of viruses known to cause diseases ranging from the common cold to more serious diseases such as Middle Eastern Respiratory Syndrome (MERS) and Severe Acute Respiratory Syndrome (SARS). The virus causing the current coronavirus epidemic has been termed "SERIOUS ACUTE RESPIRATORY SYNDROME CORONAVIRUS 2" (SARS-CoV-2). It is a new strain of coronavirus that has never been previously identified in humans before being reported in Wuhan (China) in December 2019.

The disease caused by the new Coronavirus has a name: "COVID-19" (where "CO" stands for corona, "VI" for virus, "D" for disease and "19" indicates the year in which it occurred).

The disease has an "incubation period" or the period of time that passes between the infection and the development of clinical symptoms. It is currently estimated that it varies between 2 and 11 days, up to a maximum of 14 days.

The most common symptoms of a person with COVID-19 are fever, tiredness and dry cough. Some patients may experience soreness and muscle pain, nasal congestion, runny nose, sore throat or diarrhea. These symptoms are generally mild and begin gradually. In severe cases, the infection can cause pneumonia, severe acute respiratory syndrome, kidney failure and even death.

In this regard, some people become infected but do not develop any symptoms. Generally the symptoms are mild, especially in children and young adults, and slow in the beginning. About 1 in 5 people with COVID-19 become seriously ill and have breathing difficulties, requiring hospitalization.

• 2.2. Transmission mode

- Coronaviruses can be transmitted from person to person, usually after close contact with an infected patient, for example between family members or in a healthcare setting.*
- The new Coronavirus responsible for respiratory disease COVID-19 can also be transmitted from person to person through close contact with a probable or confirmed case.*
- The new Coronavirus is a respiratory virus that mainly spreads through close contact with a sick person. The primary way is the breath droplets of infected people, for example through:*

- *saliva, coughing and sneezing*
- *direct personal contacts*
- *hands, for example by touching the mouth, nose or eyes with contaminated (not yet washed) hands*
- *In rare cases, infection can occur through faecal contamination. Normally respiratory diseases are not transmitted with food, which in any case must be handled respecting good hygiene practices and avoiding contact between raw and cooked food. Studies are underway to better understand the modalities of transmission.*
- • *2.3. Prevention of contagion No virus is capable of living and reproducing outside of a living being (man or animal), but it can survive some time outside (it is believed that Coronavirus cannot survive more than a few hours outside of the host, but the data are still uncertain since CoVID-19 is a new virus and still not sufficiently known and studied). The true prevention of contagion depends on the probability that people have to come into contact with the viruses emitted by sick subjects or healthy carriers (healthy carriers are those who have been contaminated by the virus without manifesting the symptoms or because it is still early to manifest them or because they will never manifest them by being able to eliminate the virus).*

5. Definition of responsibilities

- *The President, with the help of external and internal consultants, analyzes the critical points associated with the COVID-19 risk*
- *It therefore identifies a method for controlling and managing the risk inherent in the event.*
- *Inform participants of the event about risk management procedures*

The participants in the tender and their assistants, correctly informed by the President, have their own responsibility for compliance with the behaviors defined by current regulations and the rules that the ASD has imposed to manage the COVID -19 risk in order to keep the risk under control.

6. Covid-19 Risk

Risk control is divided into three phases

RISK ASSESSMENTS

RISK MANAGEMENT

COMMUNICATION OF RISK

PHASE 1 Risk assessment

Identification of the specificity of the structure and of the systems exercised in it, for which conditions can be created that connect the actual or potential presence of Covid 19 to the possibility of contracting the infection. This assessment must be carried out individually by each person who will have access to the event by estimating the risk index associated with their personal health status.

STEP 2 Risk management:

All interventions and procedures aimed at permanently removing or constantly containing the critical issues identified in the risk assessment phase.

PHASE 3 Risk communication:

All actions aimed at informing, training and sensitizing those affected by the potential risk

Risk assessment

The risk index will therefore be specific to each person.

As for Coronavirus, the data available so far allow us to say that this infection can cause different types of infection with which we can associate an IR.

Risk management

Viruses can enter and multiply in all people who come into contact with them, however causing different effects.

Potentially, they can all be at critical risk (3), because everyone could be "temporarily" in a "temporary" risk condition due to some imbalance and weakening of the immune system.

The G factor is therefore individual and depends on various factors.

L'ASD GENERALI ENDURANCE:

- *It implements all the procedures envisaged by current legislation aimed at limiting gatherings and behavior at risk.*
- *Implements internal procedures aimed at limiting the probability of contagion.*
- *In addition, the event is located in an area that has never been assessed by the competent authorities as a "red area"*
- *A LOW contagion PROBABILITY is estimated.*

- *P = 2 LOW IR assessment The risk index will therefore be specific to each person. P = 2 (LOW)*

- As for Coronavirus, the data available so far allow us to say that this infection can cause different types of infection to which we can associate an IR.

- *Type of infection.* RISK INDEX

- *Asymptomatic or almost infection* 1

- *Mild infection* 2

- *Serious infection*

3

- *Very critical and deadly infection*

- **Procedures for contrasting SARS-CoV-2 infection**
- **N. 1 - Correct behavior of the riders inside the place of the event.**
- Attendees must strictly comply with the indications given by the C.O. which are considered accepted from the time of registration to be made on www.enduranceonline.it.
- Correct information and awareness about correct behavior is considered the first and most important means of risk management.
- The president will have to provide for appropriate signs, encouraging the dissemination of messages to facilitate the management of flows and awareness of behavior.
- The manager in order to inform and train the athletes and their assistants, the Judging Commission and all the staff, makes information about correct behavior visible in the Secretariat area.
- (All1.). This information indicates
- The obligation to always respect the maintenance of the safety distance.
- Compliance with hand hygiene rules.
- The use of suitable personal protective equipment, starting with a mask that covers the nose and mouth.

The obligation to view this document in order to be properly informed about the procedures for contrasting SARS-CoV-2 infection.

- The need to communicate in advance the arrival time at the place of the event (via phone to

n. 3408020896 or 3356230960 at least 30 minutes before arrival)

- The obligation to register your entry and measure your body temperature
 - The obligation to communicate the names by 16 August by sending the credit and privacy card signed by each person indicated on the card.
 - The obligation to evaluate your IR and act accordingly
 - Race n. 2 companions for each registered rider and the owner of the horse indicated in the passport but the same will not have access to the following areas: vet gate-cool area-rest area-as indicated in the FISE Protocol-Particular Rules Endurance point C.
 - Access restrictions to closed places and the obligation to sanitize surfaces.
- Any information the President deems useful for risk management.

1. Information on "How to wash your hands with soap and water"

2. Information on "How to wear a mask"

3. Signage "Obligation to keep the safety distance"

5. SARS-CoV-2 anti-contagion handbook

• **Procedure for limiting the risk of gathering inside the place of the event**

- *The president draws up the program of the event as planned as possible so as to dissuade any conditions of aggregations and to regulate the flows of the waiting spaces and in the various areas to encourage compliance with the social distance of at least 1 meter, with the exception of people who on the basis of the current provisions, they are not subject to interpersonal distancing; this last aspect pertains to individual responsibility.*
- *In order to avoid gatherings, the following protocols are put in place.*
- Access to the public is prohibited. The event will be held "behind closed doors". Mandatory accreditation request by 16 August 2020 (including representatives from FISE-AUTHORITY-SPONSOR-GUESTS C.O.) as scheduled.
- Respect for the safety distance between people not belonging to the same household without device is required by the president (mask)
- Contingent accesses are foreseen on the basis of an entrance program. Athletes, when registering on Enduranceonline accept this protocol and must communicate their arrival at least half an hour before by phoning n. 3408020896 or 3356230960.
- The maximum number of people is calculated based on the capacity of the plants. It is estimated not less than 7 square meters of floor area per person (the Sant'Angelo Scalo plant is 31.510 square meters.) Max 4,500 people
- On the basis of an accurate schedule, the president, having assessed the size of the sports facilities of Sant'Angelo Scalo which widely allow the distancing between the athletes, coordinating with the person in charge of the Anti-contagion Protocol, will identify and signal specific routes of entry and exit from the competition field, as well as the cool areas and rest areas that will be named and identified by means of specific signs (bib number).

- *As regards the exit of the horses outside the training facilities, control is not the responsibility of the President but is allowed by current legislation while maintaining the spacing that is also done naturally in the specific discipline.*

- ***Risk of entry of a positive or positive potential for SARS-CoV-2 infection***

- *In order to check the inputs of positive or potential positive for SARS-CoV-2 infection within the event site, the following procedures are implemented:*
- *Detection of the inlet temperature. In the event that a temperature > 37.5 is detected, access to the person inside the competition field is prohibited.*
- *Self-declaration of the athletes and of the 2 companions, of the Guests and of the Judging Commission, with filling in an individual and parental medical history card at the time of entry that certifies that in the last 14 days the following:*
- *-do not have had a fever or body temperature above 37.5 °*
- *not having had pharyngodynia / sore throat*
- *not to have presented cough and / or difficulty breathing*
- *not having nasal rhinitis / rhinorrhea / obstruction*
- *not having tiredness / muscle pain higher than normal*
- *not having presented diarrhea / vomiting*
- *not showing any alteration of flavors and odors*
- *not being aware of having had contacts with people who have tested positive for Covid 19 (with the exception of medical and nursing staff who have had contacts for work reasons, but in any case with all legal precautions).*
- ***Register of entrances and exits in order to check the incoming flows, to be eventually made available to the Competent Authorities., Which will be carried out by the service staff delegated by the Anti-Contagion Protocol manager.***

Sanitization of environments - Procedure for sanitizing surfaces and environments

Due to the possible survival of the virus in the environment for a long time, the places and areas are subjected to sanitation according to the following procedure:

- *Complete cleaning with water and common detergents once a day.*

- *Sanitization with 1% sodium hypochlorite after cleaning once a day. For surfaces that they can be damaged by sodium hypochlorite, 70% ethanol is used after cleaning with a neutral detergent.*

Ventilation of closed rooms

During cleaning with chemicals, ventilation of the rooms is ensured. All cleaning operations are carried out using PPE

All frequently touched surfaces must be cleaned with particular care, such as walls, doors and windows surfaces, toilet and sanitary surfaces.

Personal hygiene

- *Hand hygiene. The correct application of preventive measures, such as hand hygiene, can reduce the risk of infection.*
- *The president provides special alcoholic gel dispensers with an alcohol concentration of 60-85%,*
- *Preventive measures such as hand hygiene, respiratory hygiene and social distancing, are advertised inside the place of the event through special information materials displayed.*

Emergency procedure in case of entry into the center of a positive or positive potential for SARS-CoV-2 infection

- ***If the President becomes aware that a positive for SARS-CoV-2 infection has had access to the place of the event, he carries out the following procedure:***
- *Contact the competent authority immediately, if not already informed of the fact, making available all the information in its possession.*
- *Tuscany toll-free number: 800 55 60 60*
- *Consult the register of entrances in order to determine the date of entry of the positive and the people who came into contact with it.*
- **Provides for the sanitization, as per current legislation, of all environments.**

CREW POINT

In order to avoid gatherings in the assistance areas, the C.O. and the staff in charge of providing all necessary support to the riders in the race. The staff will have bottles of water and ice available (provided by the C.O.) which will be passed on to the riders upon arrival.

It is strictly forbidden to access the assistance areas to unauthorized persons, under penalty of disqualification of the rider in the race, except as provided in point C, particular Endurance rules of the FISE protocol.

C.- SPECIAL ENDURANCE RULES - FISE AGG.TO Protocol 27 JUNE 2020

Base camp

The organizing committee appoints a person responsible for managing access.

All those authorized to access (those already provided for in point 5 b) above, to which up to two assistants can be added to the competitors, in addition to the parents for minors) must undergo the detection of body temperature once a day and if the same should be higher than 37.5 it must be access forbidden.

Paddock area

If there is a paddock area, the same must be delimited and the access allowed for a maximum of two people per horse, which will be indicated by the competitor among those accredited. Paddocks will be identified with the competitor's number and cannot be adjacent, but must have one distance of not less than one and a half meters from each other. The entrance and exit should preferably be separate

Visits area

The preliminary visits / veterinary gate area must be organized with a sufficiently large "heart" area to guarantee the maintenance of an adequate distance between binomial and binomial (currently 1 meter between people and 2 meters with the athletes during the race or training phase The corridors for visits cannot be adjacent, but have a distance of not less than two meters from each other.

Access to this area is allowed to one person per horse. The entrance and exit must be separated. Where social distancing cannot be guaranteed, a mask must be worn.

Departures / arrivals area

The departures / arrivals area must be delimited and the access allowed only to the competitors in the race (and to the technician for minors or his companion with the delegation of the responsible technician) with the bib on. In the case of categories under 14, where the figure of the accompanying person is mandatory, access is allowed to competitors and accompanying persons who must be identified by the bib number showing the same number as the competitor to accompany. Departures will be staggered, one starter every 3 minutes minimum.

Cool Area - Horse Cooling Area

The assistance area must be delimited and sufficiently large to guarantee the maintenance of an adequate distance between binomial and binomial and between tub and tub. In addition to the competitor, access is allowed only to two assistants per horse, in addition to the technician or accompanying person with delegation from the responsible technician in the event of a minor, who must be identified with the same bib number as the competitor to be assisted and must wear the masks as well as remaining the time strictly necessary to carry out the assistance.

. Assistance during the journey

The assistance on the route must be organized by the CO, one every 10 km maximum, with 2 tubs for watering the horses and bottles of water placed at "rider height in the saddle" for cooling the horses. These areas must be manned by person appointed by the Organizing Committee and communicated to the President of the Jury with the task of ensuring the presence of water in the mastelloni, of bottles and the respect of the distances by the knights. Therefore, assistance on the route by the Knights' companions / assistants is not allowed except for indifferent necessity (shoeing, accident / illness or withdrawal along the route), and in any case subject to authorization from the President of the Jury and for the time strictly necessary to assist.

In the case of a minor competitor, the presence of the technician or accompanying person with delegation is allowed, upon communication to the President of the Jury before the start of the race or during the race and in this case only for reasons arising at the start. The permanence of the technician or accompanying person with delegation is limited to the time strictly necessary to attend the transition of your pupil.

In these cases, the technicians or accompanying persons with delegation must be equipped with personal protective equipment, to be worn if the social distance cannot be guaranteed (1 meter between people and 2 meters with competitors during the race).

Protocol drawn up on June 27, 2020 based on the provisions currently in force.

IV. THE FEI CODE OF CONDUCT FOR THE WELFARE OF THE HORSE

The Fédération Equestre Internationale (FEI) expects all those involved in international equestrian sport to adhere to the FEI's Code of Conduct and to acknowledge and accept that at all times the welfare of the horse must be paramount and must never be subordinated to competitive or commercial influences.

1. At all stages during the preparation and training of competition horses, welfare must take precedence over all other demands. This includes good horse management, training methods, farriery and tack, and transportation.
2. Horses and competitors must be fit, competent and in good health before they are allowed to compete. This encompasses medication use, surgical procedures that threaten welfare or safety, pregnancy in mares and the misuse of aids.
3. Events must not prejudice horse welfare. This involves paying careful attention to the competition areas, ground surfaces, weather conditions, stabling, site safety and fitness of the horse for onward travel after the event.
4. Every effort must be made to ensure that horses receive proper attention after they have competed and that they are treated humanely when their competition careers are over. This covers proper veterinary care, competition injuries, euthanasia and retirement.
5. The FEI urges all involved with the sport to attain the highest levels of education in their areas of expertise.

A full copy of this Code can be obtained from the:

5. Transport Of Horses

Horses must be fit to travel and be transported in suitable vehicles f. Any government requirements for disease testing and control must be requested well in advance, to ensure that the horse is in compliance by the time of arrival at the border of the country where the Event is taking place. Athletes, or their representatives, have the responsibility to comply with national legislation in both their country of origin and the host nation of the Event. Where necessary athletes must contact local government authorities or veterinary advisors for information regarding animal health requirements and transport legislation. Within the European Union (EU), this includes EU Council Regulation (EC) No 1/2005 concerning the protection of animals during transport within the Member States of the EU.

6. Venue Arrival Information & Fitness To Compete

6.1 Passports. FEI General Regulations

Article 137

For all Horses on FEI Passports/FEI Recognition Cards issues, please address to your National Federation

All Horses competing at FEI Events must be registered with the FEI.

FEI Passports or FEI Recognition Cards (for those Horses with a national passport approved by the FEI) are compulsory for FEI Events.

NB: Horses in CIMs, in their country of residence are not required to have an FEI Passport or FEI Recognition Card but must be properly registered with the FEI and identifiable (GRs. 137.2).

Event's Category	FEI Passport / FEI Recognition Card Required
National Events	No FEI Passport/FEI Recognition Card required
CEI1* - CEI 2*	1) FEI Passports/FEI Recognition Cards are not compulsory for horses competing in their country of residence 2) FEI Passports/FEI Recognition Cards are compulsory for horses competing in a country other than the country of the horse' residency
CEI 3*	FEI Passports/FEI Recognition Cards are compulsory for all Horses
All Championships/Games	FEI Passports/FEI Recognition Cards are compulsory for all Horses

Athletes who do not present a Horse's Passport and/or Recognition Card, or one that is not correctly validated or fail to meet other passport requirements will be **subject to Sanctions in accordance with Annex VI of the FEI Veterinary Regulations** and may not be allowed to compete.

NB: for Horses permanently resident in a Member State of the European Union: all Horses must have a national EU passport in compliance with EU Regulations to which a FEI Recognition card is applied. The exception to this being Horses in possession of an FEI passport which has been continually revalidated without interruption.

6.2 Vaccinations - Equine Influenza

FEI Veterinary Regulations Article 1003

Horses competing at FEI Events must comply with the requirements for Equine Influenza vaccination in accordance with the Veterinary Regulations and as summarised below.

VACCINATION	PROTOCOL	ELIGIBILITY TO ENTER VENUE
Primary Course	1 st Vaccination: day 0 2 nd Vaccination: day 21-92	May compete 7 days after the 2 nd Vaccination
First Booster	Within 7 months of the 2 nd vaccination of the Primary Course	May compete for 6 months +21 days after the 2 nd vaccination of the Primary Course Must not compete in the 7 days after receiving a vaccination
Boosters	MINIMUM: within one year of previous booster vaccination IF COMPETING: must be in the 6 months +21 days of the booster previous vaccination	Must have been vaccinated within 6 months +21 days before arriving at the Event Must not compete in the 7 days after receiving a vaccination

All FEI registered Horses intending to compete at FEI Events (including CIMs) must be vaccinated against Equine Influenza in accordance with these VRs. The exception being if the applicable domestic legislation prevents the use of Equine Influenza vaccines within the relevant territory.

6.3 Examination On Arrival

FEI Veterinary Regulations Article 1031

On arrival at an Event venue all Horses must undergo an examination by a veterinarian to confirm their identification from their passport and micro-chip ID (where present), their vaccination status and general health. To protect all horses attending events, any Horse with a questionable health status, concerning vaccination, disease or other concerns, must be stabled within the isolation facilities provided by the Organising Committee pending a decision on entering the venue.

6.4 Horse Inspections

FEI Veterinary Regulations Articles 1034-1042

All Horses will be assessed for their fitness to compete during the Horse Inspection. Any Horse demonstrating questionable fitness may be referred to the Holding Box for further veterinary examination. Horses not deemed fit to compete by the Inspection Panel will not be permitted to compete.

6.5 Limb Sensitivity Examination

FEI Veterinary Regulations Articles 1048-1053

All Horses are subject to examination under the protocol for abnormal limb sensitivity throughout the period of an Event. For Jumping that includes, but is not limited to, between rounds and before the Jump Off. For Endurance that includes, but is not limited to, pre-ride, during the ride and after the ride. Horses may be examined once or on multiple occasions during the Period of an Event.

Horses may be selected for examination under the protocol randomly or they may be targeted. All Horses selected to be tested must submit promptly to the examination or are subject to immediate disqualification. There is no obligation to examine any specific number of Horses at an Event.

7 Equine Anti-Doping And Controlled Medication Programme (EADCMP).

FEI Veterinary Regulations, Chapter VII

7.1 Sampling.

FEI Veterinary Regulations, Chapter VII

All horses competing at FEI Events may be subject to sampling for the presence of FEI Equine Prohibited Substances in accordance with the FEI Equine Anti-Doping and Controlled Medication Regulations (EADCMRs). Horses may be selected for sampling in accordance with obligatory testing, targeted or random sampling procedures. Refer to FEI Financial Charges for details of fees relating to Equine and Human Anti-Doping program (EADCMP), which OCs/NFs have the right to charge to the athlete (applicable for all FEI events worldwide).

7.2 Elective Testing.

FEI Veterinary Regulations Articles 1058

Elective Testing may be carried out prior to an Event to check for the presence of Prohibited Substances. Please refer to <http://inside.fei.org/fei/your-role/veterinarians> for information and details.

7.3 Hyposensitivity Control System Examination
FEI Veterinary Regulations, Annex VIII

All horses competing in FEI Endurance events are subject to Hyposensitivity Control System Examination. Horses may be examined once or on multiple occasions during the Period of the Event and may be selected randomly and/or target tested by the Ground Jury and/or Veterinary Commission.

All horses selected to be tested must submit promptly to the examination. A refusal by the PR or his/her representative to submit a horse for examination will lead to disqualification and a yellow warning card. Withdrawal of the horse is not allowed once the PR or support personnel has been notified that the examination is to take place.

XIV. HUMAN ANTI-DOPING

Athletes can be tested at any FEI Event, by the FEI or by other Anti-Doping Organisations with Testing jurisdiction. Organisers will have the responsibility to provide facilities and staff/volunteers to facilitate such Testing if requested by the FEI as outlined in article 22.3 of the FEIs' Anti-doping Rules for Human Athletes (ADRHA).

The ADRHA rules are published on the FEI's website at <http://inside.fei.org/content/anti-doping-rules>.

XV. ADDITIONAL INFORMATION

1. THE FEI POLICY FOR ENHANCED COMPETITION SAFETY DURING THE COVID-19 PANDEMIC

The FEI Policy for Enhanced Competition Safety during the Covid-19 Pandemic ("Policy") <https://inside.fei.org/fei/covid-19/return-to-play/policy-tools> is mandatory and applies for any FEI Event taking place **as of 1 July 2020**. The Policy has been developed based on currently accepted best practices by the WHO and US Center for Disease Control (CDC) and will be continually reviewed and updated as more information becomes available. It is not intended to replace the applicable guidance and policies from domestic government and health authorities, but to supplement their recommendations with sport specific considerations.

The OC shall submit the risk assessment and mitigation plan (including name and contact details of the person in charge) to the FEI as an annex to the Event Schedule, **at the latest ten (10) working days before the event's deadline for Definite Entries**.

Events for which the FEI has not received the documented risk assessment and mitigation measures plan in accordance with article 2.1.g) of the Policy **will be removed from the FEI calendar** in accordance with Article 112.3 of the FEI General Regulations.

ASSUMPTION OF RISK / WAIVER OF LIABILITY

In consideration of being allowed to participate in the Event and related activities, all Participants (as defined in the Policy) acknowledge, appreciate, and agree that:

1. Participation includes possible exposure to and illness from infectious diseases including but not limited to COVID-19. While particular rules and personal discipline may reduce this risk, the risk of serious illness and death does exist; and,
2. The Participants knowingly and freely assume all such risks, both known and unknown, even if arising from the negligence of the OC or others, and assume full responsibility for their participation; and,
3. The Participants willingly agree to comply with the stated and customary terms and conditions for participation as regards protection against infectious diseases. If, however, a Participant observes any unusual or significant hazard during his/her presence or participation, the Participant will remove himself/herself from participation and bring such to the attention of the nearest official immediately; and,
4. The Participants, for themselves and on behalf of their heirs, assigns, personal representatives and next of kin, HEREBY RELEASE AND HOLD HARMLESS THE OC AND THE FEI, their officers, officials, agents, and/or employees, other participants, sponsoring agencies, sponsors, advertisers, and if applicable, owners and lessors of premises used to conduct the event ("RELEASEES"), WITH RESPECT TO ANY AND ALL ILLNESS, DISABILITY, DEATH, or loss or damage to person or property, WHETHER ARISING FROM THE NEGLIGENCE OF RELEASEES OR OTHERWISE, to the fullest extent permitted by law.

The Participants confirm to have read this release of liability and assumption of risk agreement, fully understand its terms, understand that they have given up substantial rights.

2. Insurances And National Requirements

In exceptional circumstances, together with the approval of Chefs d'Equipe, host NF delegate, if any, and the Ground Jury, the Organiser may change the schedule in order to clarify any matter arising from an omission or due to unforeseen circumstances. Any such changes must be notified to all athletes and officials as soon as possible and they must be reported to the FEI Secretary General by the Technical Delegate.

2.1 ATHLETES, OWNERS AND SUPPORT PERSONNEL

2.1.1 Personal Accident and Health Insurance

It is your responsibility as an Athlete/Owner/ Support Personnel to ensure that you have adequate personal accident insurance in place to cover your participation at FEI Events and in particular to insure against any personal injury or medical expenses arising from an accident, injury or illness which may occur at a FEI Event.

You should check with your National Federation to confirm if your National Federation's insurance policy (if any) covers personal accidents and/or illnesses which may occur when you are attending at/participating in FEI Events.

If your National Federation does not have a personal accident/health insurance policy or if the National Federation's insurance policy does not cover personal accident or health claims, then you should obtain your own personal accident and health insurance policy to cover your attendance/participation at FEI Events.

2.1.2 Personal Property Insurance

You should also ensure that you are insured against property loss, theft or damage which may occur at an FEI Event.

Again, the advice is to check with your National Federation to confirm if they have an insurance policy in place which would cover you in case of such property loss, theft or damage. If not, then you should obtain your own personal property insurance to cover such situations.

2.1.3 Press Equipment

Press equipment and other items left in the Press workroom, Press lockers, the Press Tribune or anywhere on the showgrounds are left entirely at the owner's risk. The Organising Committee does not accept any responsibility for any loss or damage to such equipment or items. Members of the Press are advised not to leave any equipment or personal items unattended.

2.2 ATHLETES AND OWNERS

2.2.1 Third Party Liability Insurance

As an Athlete/Owner you are personally responsible for damages to third parties caused by you, your employees, Support Personnel, your agents or your Horses. You are, therefore, strongly advised to take out third-party liability insurance providing full coverage in relation to FEI Events at home and abroad, and to keep the policy up to date.

The FEI and the Organiser will NOT be responsible for any damage caused to third parties by you, your employees, Support Personnel, your agents or your Horses.

2.2.2 Additional Liability Information

--

2.2.3 Horse Insurance

As an Owner you should ensure that your Horses are adequately insured against any injuries or illnesses they may sustain while participating at a FEI Event.

[FEI Permitted Treating Veterinarians \(PTVs\) \(Art 1005\) are to have adequate professional indemnity insurance.](#)

3. Protests / Appeals

To be valid, all Protests and Appeals must be made in writing and accompanied by a deposit of CHF150. – or equivalent.

Protest and appeal forms are available on FEI website.

<https://inside.fei.org/fei/regulations/general-rules>

4. Disputes

In the event of any discussion concerning the interpretation of the schedule (in translated languages), the English version will be decisive.

5. Modifications Of Schedule

In exceptional circumstances, together with the approval of Chefs d'Equipe and Ground Jury the OC reserves the right to modify the schedule in order to clarify any matter or matters arising from an omission or due to unforeseen circumstances.

Unforeseen circumstances do not include situations arising as a result of the OC altering the approved Schedule without FEI's authorisation. Any such changes must be notified to all competitors and officials as soon as possible and they must be reported to the FEI Secretary General by the Foreign Judge.

6. Additional Information from the OC

The event will respect the covid - 19 health protocol provided by the Ministry of Health and the NF for the contrast and containment of the virus covid 19.

Our O.C. drew up the anti-contagion protocol attached here .

WE ARE NOT RESPONSIBLE FOR YOUR SAFETY – IT'S YOUR OWN RESPONSIBILITY AND IF YOU DON ' T RESPECT THE GENERAL HYGIENIC RULES AND OUR SPECIAL HYGIENIC RULES THE RIDER WILL BE ELIMINATED AND HAS TO LEAVE IMMEDIATELY THE SHOWGROUND (including his/her crew members)
