- The Event Covid-19 risk assessment and risk mitigation plan in accordance with the [FEI Policy for Enhanced Competition Safety during the Covid-19 Pandemic](#)
- The Event Approved Schedule

Given the current covid-19 situation, please note that the FEI's approval of a Schedule should not be taken as an absolute guarantee that the Event will definitely go ahead. The decision whether the Event can take place must be made by the OC and NF in close consultation with the applicable domestic government and public health authorities. It is the responsibility of each Participant to check the status of the Event prior to planning his/her travel to the Event.

Guidance for the use of the WHO Risk Assessment tools in the context of COVID-19 - FEI version

Guidance for FEI Event organisers ("OCs") during the current outbreak of COVID-19

In view of the current outbreak of COVID-19, this disease-specific and event-specific risk assessment and mitigation checklist has been developed by WHO for use by host countries and event organizers, to assess the specific risk of COVID-19.

The FEI has slightly adapted the wording in the document, mainly by replacing the initial term "mass gathering sporting event" by "FEI Event".

Under the FEI Policy for Enhanced Competition Safety during the Covid-19 Pandemic, which applies to all FEI Events taking place after 1 July 2020, all OCs of FEI Events must carry out a risk assessment of their Event in terms of Covid-19 transmission, using the present document.

The following risk assessment and mitigation checklist should be used in conjunction with the "WHO Mass Gathering Sports Addendum Guidelines" - OCs should consider the term "mass gathering" in it as synonym of "FEI Event" in this context.

In order to accurately provide answers the following risk assessment and mitigation checklist, OCs must be knowledgeable on the current COVID-19 outbreak. OCs should reference the daily global COVID-19 situation reports provided by WHO as well as the national COVID-19 situation reports, if available.

The tool must be completed in this Excel spreadsheet (see following tabs), as the scores are automatically calculated there. Once the tool is completed, the scores received in the Excel spreadsheet for both sections will appear in the decision matrix found on the final tab ("Overall risk scores") for the Event's overall risk score to be determined.

It must be ensured that this risk assessment is conducted with input from local public health authorities and that the necessary personnel with expertise in mass gatherings, risk assessment, epidemiology, and infectious disease control measures are included from the initial stages of planning.

For the final determination, factors under consideration include:

- the current stage of the COVID-19 outbreak and known transmission dynamics
- the geographical distribution and number of participants, and their individual risk profile
- the risk assessment tool
- the mitigation measures that are currently in place or feasible and any discipline-specific guidance issued by the FEI.

It is important to remember that while mitigation measures can reduce the risk of COVID-19 infections, they cannot completely eliminate the threat. It is WHO's view that all countries with community transmission should seriously consider postponing or reducing sport events that bring people together and have the potential to amplify disease, and support the recommended best practice of physical distancing. Any decision will be supported through the use of WHO tools, in particular this risk assessment tool.

If movement restrictions and further national measures have been established in the country, the risk assessment does not apply.

However, when the process of re-opening/conducting mass gatherings is being considered post movement restrictions, it will be key to ensure any decisions are based on a risk assessment, such as the WHO Mass gatherings COVID-19 risk assessment.

Risk assessment for COVID-19

1

The questions below will enable OCs to review the additional considerations specific to sports, and thus inform their risk assessment of COVID-19 associated with their Event. This will help OCs understand and manage any additional risk from COVID-19.

The risk assessment should be reviewed and reassessed regularly during the planning phase and updated immediately prior to the transition to the operational phase, especially in light of the rapidly evolving nature of the outbreak. Reference should be made to the latest technical guidance and situation reports on the WHO website.

The risk assessment for COVID-19 associated with the Event must be coordinated and integrated with the host country's national risk assessment for COVID-19. The person completing the questionnaire should include input from the local public health authorities, consult WHO's latest technical guidance and ensure that there is an up-to-date evaluation of the epidemiological situation.

Please answer Yes (1) or No (0) to the following questions to determine a risk assessment score that incorporates factors specific to sporting events

Additional risk of COVID-19 to the sporting event	Yes (1)/No (0)	Score
Will the event be held in a country that has documented active local transmission of COVID-19 (community spread)?	1	1
Will the event be held in a single venue or multiple venues/cities/countries? (single venue = 0; multiple venues = 1)	0	0
Will the event include international participants (athletes and spectators) from countries that have documented active local transmission of COVID-19 (community spread)? (NB: if the Event does not involve spectators, please clarify this in the comments to the questions in relation to spectators in the "Mitigation Checklist" sheet)	1	1
Will the event include a significant number of participants (athletes or spectators) at higher risk of severe COVID-19 disease (e.g., people over 65 years of age or people with underlying health conditions)?	0	0
Will the event include sports that are considered at higher risk of spread for COVID-19 (eg, contact sports)?	0	0
Will the event be held indoors? (Yes = 1; No = 0)	0	0
Total COVID-19 risk score		2

Mitigation checklist for COVID-19

Mitigation measures assess the current effort and planning to reduce the risk of spread of COVID-19 disease for the event. As mitigation measures can reduce the overall risk of the sporting event contributing to the spread of COVID-19, they should be taken into account after the risk assessment has occurred to gain a clearer understanding of the overall risk of transmission and further spread of COVID-19, should the event be held. Together with the risk assessment score, the mitigation measure will contribute to the decision matrix and influence the assessment of the overall risk of transmission and further spread of COVID-19 in relation to the event.

EMERGENZA COVID-19

PROTOCOLLO DI SICUREZZA ANTI-CONTAGIO –Gare di Endurance del 28-30 Maggio 2021 Isola della Scala- VR

Integrazione al DVR-DOCUMENTO DI VALUTAZIONE DEI RISCHI ai sensi degli artt. 17, 28 e 29 del D.Lgs. 9 Aprile 2008, N.81 e seguenti

-Presidente ASD GARDA ENDURANCE TEAM James Coppini

-Responsabile Protocollo Sanitario Chiara Vivarelli

Valutazione del rischio biologico correlato all'improvvisa emergenza legata alla diffusione del virus SARS-CoV-2 (cosiddetto “coronavirus”) causa della malattia Covid-19

1. Scopo

Premesso che, in relazione alle situazioni di pericolo venutesi a creare nel nostro Paese con la diffusione del COVID-19, in riferimento alle specifiche disposizioni legislative, ed in particolare al DPCM 22 marzo 2020, l'attività di Endurance Equestre è classificata con rischio basso, il presente documento è stato redatto al fine di valutare il rischio biologico correlato all'improvvisa emergenza legata alla diffusione del virus SARS-CoV-2 per Garda Endurance Team al fine di definire un insieme di misure preventive e protettive atte a ridurre al minimo tale rischio per l'evento che si terrà a Isola della Scala - VR nei giorni 28-29-30 Maggio 2021.

Ciò premesso, l'ASD si è attivata per adottare tutte le misure necessarie a garantire il contrasto ed il contenimento della diffusione del nuovo virus nel corso dell'evento denominato "Premio Allevamento", disciplinandolo con il presente piano per rendere l'evento un "luogo sicuro" in cui i cavalieri, la Commissione giudicante, lo Staff, compatibilmente con le limitazioni poste dagli specifici provvedimenti normativi possano praticare la disciplina equestre dell'Endurance.

A tale riguardo, vengono forniti tutti gli accorgimenti necessari che devono essere adottati per contrastare la diffusione ed il contagio del COVID-19.

Quanto contenuto nel presente documento dovrà essere portato a conoscenza e recepito da chiunque sarà autorizzato all'ingresso nell'evento sopra indicato

2. Introduzione

2.1. Aspetti generici,

L'Organizzazione mondiale della sanità (Oms) ha annunciato in data 11.02.2020 il nuovo nome per la malattia da nuovo coronavirus: Covid-19. Il nome è l'acronimo di Co (corona); Vi (virus); D ('disease', malattia) e 19 (l'anno di identificazione del virus).

I "Coronavirus" sono una vasta famiglia di virus noti per causare malattie che vanno dal comune raffreddore a malattie più gravi come la Sindrome respiratoria mediorientale (MERS) e la Sindrome respiratoria acuta grave (SARS). Il virus che causa l'attuale epidemia di coronavirus è stato denominato "SINDROME RESPIRATORIA ACUTA GRAVE CORONAVIRUS 2" (SARS-CoV-2). Si tratta di un nuovo ceppo di coronavirus che non è stato precedentemente mai identificato nell'uomo prima di essere segnalato a Wuhan (Cina) a dicembre 2019.

La malattia provocata dal nuovo Coronavirus ha un nome: "COVID-19" (dove "CO" sta per corona, "VI" per virus, "D" per disease e "19" indica l'anno in cui si è manifestata).

La malattia presenta un "periodo di incubazione" ovvero il periodo di tempo che intercorre fra il contagio e lo sviluppo dei sintomi clinici. Si stima attualmente che vari fra 2 e 11 giorni, fino ad un massimo di 14 giorni.

I sintomi più comuni di una persona affetta da COVID-19 sono febbre, stanchezza e tosse secca. Alcuni pazienti possono presentare indolenzimento e dolori muscolari, congestione nasale, naso che cola, mal di gola o diarrea. Questi sintomi sono generalmente lievi e iniziano gradualmente. Nei casi più gravi, l'infezione può causare polmonite, sindrome respiratoria acuta grave, insufficienza renale e persino la morte.

A questo proposito, alcune persone si infettano ma non sviluppano alcun sintomo. Generalmente i sintomi sono lievi, soprattutto nei bambini e nei giovani adulti, e a inizio lento. Circa 1 su 5 persone con COVID-19 si ammala gravemente e presenta difficoltà respiratorie, richiedendo il ricovero in ambiente ospedaliero.

2.2. Modalità di trasmissione

I Coronavirus possono essere trasmessi da persona a persona, di solito dopo un contatto stretto con un paziente infetto, ad esempio tra familiari o in ambiente sanitario.

Anche il nuovo Coronavirus responsabile della malattia respiratoria COVID-19 può essere trasmesso da persona a persona tramite un contatto stretto con un caso probabile o confermato.

Il nuovo Coronavirus è un virus respiratorio che si diffonde principalmente attraverso il contatto stretto con una persona malata. La via primaria sono le goccioline del respiro delle persone infette ad esempio tramite:

- la saliva, tossendo e starnutendo
- contatti diretti personali
- le mani, ad esempio toccando con le mani contaminate (non ancora lavate) bocca, naso o occhi
- In casi rari il contagio può avvenire attraverso contaminazione fecale. Normalmente le malattie respiratorie non si tramettono con gli alimenti, che comunque devono essere manipolati rispettando le buone pratiche igieniche ed evitando il contatto fra alimenti crudi e cotti. Studi sono in corso per comprendere meglio le modalità di trasmissione .
-
- **2.3. Prevenzione del contagio** Nessun virus è capace di vivere e di riprodursi al di fuori di un essere vivente (uomo o animale), ma può sopravvivere un po' di tempo all'esterno (si ritiene che il Coronavirus non possa sopravvivere più di qualche ora fuori dell'ospite, ma i dati sono ancora incerti dato che il CoVID-19 è un virus nuovo e ancora non sufficientemente conosciuto e studiato). La vera prevenzione del contagio dipende dalla probabilità che le persone hanno di entrare in contatto con i virus emessi da soggetti malati o portatori sani (sono definiti portatori sani coloro che sono stati contaminati dal virus senza manifestare i sintomi o perché è ancora presto per manifestarli o perché non li manifesteranno mai essendo capaci di eliminare il virus).

5. Definizione delle responsabilità

- Il Presidente avvalendosi dell'aiuto di consulenti esterni e interni analizza i punti critici associati al rischio COVID-19
- Individua quindi una modalità di controllo e gestione del rischio inherente la manifestazione.
- Informa i partecipanti alla manifestazione circa le procedure di gestione del rischio

I partecipanti alla gara e loro assistenti, correttamente informati dal Presidente hanno la responsabilità propria del rispetto dei comportamenti definiti dalle normative vigenti e delle regole che l'ASD si è imposta per gestire il rischio COVID -19 al fine di tenere sotto controllo il rischio.

6. Rischio Covid-19

Il controllo del rischio si divide in tre fasi

VALUTAZIONI DEL RISCHIO

GESTIONE DEL RISCHIO

COMUNICAZIONE DEL RISCHIO

FASE 1 Valutazione del rischio

Individuazione della specificità della struttura e degli impianti in essa esercitati, per i quali si possono realizzare condizioni che collegano la presenza effettiva o potenziale del Covid 19 alla possibilità di contrarre l'infezione. Tale valutazione deve essere effettuata individualmente da ogni persona che avrà accesso all' evento tramite stima dell'indice di rischio associato al proprio personale stato di salute.

FASE 2 Gestione del rischio:

Tutti gli interventi e le procedure volte a rimuovere definitivamente o a contenere costantemente le criticità individuate nella fase di valutazione del rischio.

FASE 3 Comunicazione del rischio:

Tutte le azioni finalizzate a informare, formare e sensibilizzare i soggetti interessati dal rischio potenziale

Valutazione del rischio

L' indice di rischio sarà specifico quindi per ogni persona.

Per quanto riguarda il Coronavirus, i dati finora disponibili ci permettono di dire che questa infezione può causare diversi tipi di infezione a cui possiamo associare un IR.

Gestione del rischio

I virus possono entrare e moltiplicarsi in tutte le persone che vengono a contatto con essi causando però effetti diversi.

Potenzialmente, a rischio critico (3) possono essere tutti, perché ognuno potrebbe trovarsi "momentaneamente" in una condizione di rischio "temporaneo" a causa di alcuni fattori squilibranti e indebolenti il sistema immunitario.

Il fattore G è quindi individuale e dipende da vari fattori.

L'ASD GARDÀ ENDURANCE TEAM

- Mette in atto tutte le procedure previste dalla normativa vigente volte a limitare assembramenti e comportamenti a rischio.
- Mette in atto procedure interne volte a limitare la probabilità di contagio.
- **Si stima una PROBABILITA' BASSA di contagio.**
- **P=2 BASSA**
- **Valutazione di IR** L'indice di rischio sarà specifico quindi per ogni persona. P=2 (BASSA)
- Per quanto riguarda il Coronavirus, i dati finora disponibili ci permettono di dire che questa infezione può causare diversi tipi di infezione a cui possiamo associare un IR.
- **Tipo di infezione** INDICE DI RISCHIO
 - Infezione asintomatica o quasi 1
 - Infezione lieve 2
 - Infezione grave 3
 - Infezione molto critica e mortale 4

CREW POINT

Al fine di evitare assembramenti alle aree assistenza, sarà cura del C.O. e del personale incaricato fornire tutto il supporto necessario ai cavalieri in gara.

Il personale avrà a disposizione bottiglie di acqua e ghiaccio (forniti dal C.O.) che passerà ai cavalieri al momento del loro arrivo.

E' fatto divieto assoluto di accesso alle aree assistenza alle persone non autorizzate pena la squalifica del cavaliere in gara ad eccezione di quanto previsto al punto C norme particolari Endurance del protocollo FISE.

C.- NORME PARTICOLARI ENDURANCE-Protocollo FISE AGG.TO AGOSTO 2020

Campo base

Il Comitato organizzatore nomina una persona responsabile di gestire gli accessi.

Tutti gli autorizzati ad accedere (quelli già previsti al punto 5 b) che precede, a cui aggiungere fino a due assistenti ai concorrenti, oltre i genitori per i minori) devono sottoporsi obbligatoriamente alla rilevazione della temperatura corporea una volta al giorno e se la stessa dovesse risultare superiore a 37,5 deve essere vietato l'accesso.

Area Paddock

Nel caso sia prevista un'area paddock la stessa deve essere delimitata e l'accesso consentito a massimo due persone per cavallo, che saranno indicati dal concorrente tra quelli accreditati. I paddock saranno identificati con il numero del concorrente e non possono essere adiacenti, ma devono avere una distanza di non meno di un metro e mezzo l'uno dall'altro. L'entrata e l'uscita devono essere preferibilmente separate .

Area visite

L'area visite preliminari/cancello veterinario deve essere organizzata con un'area "cuore" sufficientemente ampia per garantire il mantenimento di una distanza adeguata tra binomio e binomio (attualmente 1 metro tra persone e 2 metri con gli atleti in fase di gara o allenamento). I corridoi per le visite non possono essere adiacenti, ma avere una distanza di non meno di due metri l'uno dall'altro.

L'accesso a detta area è consentito ad una persona per cavallo. L'entrata e l'uscita devono essere separate. Dove non sia possibile garantire il distanziamento sociale è necessario indossare la mascherina.

Area partenze/arrivi

L'area partenze/arrivi deve essere delimitata e l'accesso consentito solo ai concorrenti alla gara (e al tecnico per i minorenni o al suo accompagnatore con delega del tecnico responsabile) con indossato il pettorale. Nel caso di categorie under 14, dove è obbligatoria la figura dell'accompagnatore, l'accesso è consentito ai concorrenti e agli Accompagnatori che dovranno essere identificati dal pettorale riportante lo stesso numero del concorrente da accompagnare. Nelle gare di velocità con un numero di partenti inferiore a trenta sono consentite le partenze in gruppo.

Qualora i partenti fossero superiori a trenta è necessario dividere in gruppi non superiori a trenta concorrenti. I gruppi dovranno partire a una distanza di almeno 15 minuti l'uno dall'altro. Al momento della partenza in gruppo i concorrenti dovranno indossare la mascherina. L'entrata e l'uscita devono essere separate.

Cool Area- Area Raffreddamento Cavalli

L'area assistenze deve essere delimitata e sufficientemente ampia per garantire il mantenimento di una distanza adeguata tra binomio e binomio tra mastellone e mastellone. L'accesso è consentito, oltre al concorrente, solo a due assistenti per cavallo, oltre al tecnico o accompagnatore con delega del tecnico responsabile in caso di minore, che dovranno essere identificati con lo stesso numero di pettorale del concorrente da assistere e dovranno indossare le mascherine oltreché restare il tempo strettamente necessario per effettuare l'assistenza.

Assistenze durante il percorso

Le assistenze sul percorso devono essere organizzate dal C.O., una ogni massimo 10 km, con 2 mastelloni per l'abbeveraggio dei cavalli e bottiglie d'acqua poste ad "altezza Cavaliere in sella" per il raffrescamento dei Cavalli. Dette aree devono essere presidiate da persona incaricata dal Comitato Organizzatore e comunicata al Presidente di Giuria con il compito di garantire la presenza di acqua nei mastelloni, di bottiglie e il rispetto delle distanze da parte dei cavalieri. Pertanto, non è consentita l'assistenza sul percorso da parte degli accompagnatori/assistenti dei Cavalieri se non per necessità indifferibile (ferratura, incidente/malore o ritiro lungo il percorso), e comunque previo nullaosta del Presidente di Giuria e per il tempo strettamente necessario per effettuare l'assistenza.

In caso di concorrente minorenne è consentita la presenza del tecnico o accompagnatore con delega, previa comunicazione al Presidente di Giuria prima dell'inizio della gara o durante la gara e in tale ipotesi solo per motivazioni sopravvenute alla partenza. La permanenza del tecnico o dell'accompagnatore con delega è limitata al tempo strettamente necessario per assistere al passaggio del proprio allievo.

In queste ipotesi i tecnici o gli accompagnatori con delega dovranno essere dotati dei mezzi di protezione personale, da indossare qualora non sia possibile garantire la distanza sociale (1 metro tra persone e 2 metri con i concorrenti in fase di gara).

Protocollo redatto il 21 Marzo 2021 in base alle disposizioni attualmente vigenti.

IV. THE FEI CODE OF CONDUCT FOR THE WELFARE OF THE HORSE

The Fédération Equestre Internationale (FEI) expects all those involved in international equestrian sport to adhere to the FEI's Code of Conduct and to acknowledge and accept that at all times the welfare of the horse must be paramount and must never be subordinated to competitive or commercial influences.

1. At all stages during the preparation and training of competition horses, welfare must take precedence over all other demands. This includes good horse management, training methods, farriery and tack, and transportation.
2. Horses and competitors must be fit, competent and in good health before they are allowed to compete. This encompasses medication use, surgical procedures that threaten welfare or safety, pregnancy in mares and the misuse of aids.
3. Events must not prejudice horse welfare. This involves paying careful attention to the competition areas, ground surfaces, weather conditions, stabling, site safety and fitness of the horse for onward travel after the event.
4. Every effort must be made to ensure that horses receive proper attention after they have competed and that they are treated humanely when their competition careers are over. This covers proper veterinary care, competition injuries, euthanasia and retirement.
5. The FEI urges all involved with the sport to attain the highest levels of education in their areas of expertise.
