REGULATORY PROTOCOL FOR THE CONTAINMENT OF THE SPREAD OF COVID-19

CITTA' DELLA PIEVE-PONTICELLI- ITALY

23-24 SEPTEMBER 2022

CEI2*-CEI*-CEN/B-CENB/R-CEN/A - DEBUTTANTI

PREMISE

The objective of this Regulatory Protocol is to provide organizational and operational indications aimed at increasing the effectiveness of the precautionary containment measures adopted to combat the COVID-19 epidemic. The measures indicated follow the logic of protection and the provisions of the Italian Legislator and the indications of the Health Authority. Compliance with national and local legislation on hygiene and health indications aimed at preventing the spread of the Covid-19 virus is an essential premise of this document. The Recommendations of the World Health Organization, the Italian Ministry of Health and the individual Italian Regions and Autonomous Provinces are and will be considered a reference point in the application of these Measures and of this Operational Protocol Events-Events in the period of Covid-19. Document reviews may be progressively adopted and disseminated in relation to the progress of the Covid-19 pandemic. This document is aimed at allowing the event in compliance with priority health protection needs related to the risk of spread from Covid-19. The indications provided in this protocol concern the Organizing Committee, the operators and all the attending people involved in the event.

INTRODUCTION

General Description Coronaviruses are a large family of viruses known to cause illnesses ranging from the common cold to more serious illnesses such as Middle East Respiratory Syndrome (MERS) and Severe Acute Respiratory Syndrome (SARS). The World Health Organization (WHO) announced on 11 February 2020 the new name for the new coronavirus disease: Covid-19. The name is the acronym of Co (crown); Vi (virus); D ('disease') and 19 (the year the virus was identified). The virus causing the current coronavirus outbreak has been called "SEVERE ACUTE RESPIRATORY SYNDROME CORONAVIRUS 2" (SARS-CoV-2). This is a new coronavirus strain that was never previously identified in humans before being reported in Wuhan (China) in December 2019. The disease has an "incubation period" or the period of time that elapses between the infection and the development of clinical symptoms. It is currently estimated that it varies between 2 and 11 days, up to a maximum of 14 days. The most common symptoms of a person with COVID-19 are fever, fatigue, and a dry cough. Some patients may experience muscle aches and pains, nasal congestion, runny nose, sore throat, or diarrhea. These symptoms are usually mild and begin gradually. In severe cases, the infection can cause pneumonia, severe acute respiratory syndrome, kidney failure, and even death. In this regard, some people become infected but do not develop any symptoms. Symptoms are generally mild, especially in children and young adults, and slow onset.

Method of transmission

Coronaviruses can be transmitted from person to person, usually after close contact with an infected patient, such as between family members or in a healthcare setting. 3/5 The new Coronavirus responsible for COVID-19 respiratory disease can also be passed from person to person through close contact with a probable or confirmed case.

The new Coronavirus is a respiratory virus that is spread mainly through close contact with a sick person. The primary route is the droplets of the breath of infected people for example through:

- saliva, coughing and sneezing
- direct personal contacts

- hands, for example by touching contaminated (not yet washed) hands with your mouth, nose or eyes
- in rare cases, the infection can occur through faecal contamination.

Respiratory diseases are not normally transmitted with food, which in any case must be handled respecting good hygiene practices and avoiding contact between raw and cooked foods. No virus is capable of living and reproducing outside of a living being (man or animal), but for a limited time it can survive outside (it is believed that the Coronavirus cannot survive more than a few hours outside the host, but the data are still uncertain given that COVID-19 is a new virus and still not sufficiently known and studied). True prevention of contagion depends on the likelihood that people have of coming into contact with viruses emitted by sick people or healthy carriers (healthy carriers are defined as those who have been contaminated by the virus without showing symptoms or because it is still early to manifest them or because they will never manifest them being able to eliminate the virus).

GENERAL PREVENTION AND PROTECTION MEASURES:

The termination of the State of Emergency in Italy was on March 30, 2022. On April 30, the provisions on the Covid-19 Green Pass envisaged by Law Decree no. 24 of 24 March 2022, have lapsed.

At the time this document is drawn up, the "Green pass" certification is no longer required and the obligation to use PPE (Personal Protective Equipment) ceases both outdoor and indoor.

However, the following anti-contagion measures are to be regarded as strongly recommended.

The prevention and protection measures are aimed at managing the risk of contagion for the entire duration of the event. They should be adopted bearing in mind that the prevention and protection measures are not to be understood as alternatives to each other, but as minimum equipment in order to prevent contagion.

CONTAGION PREVENTION - MAIN MEASURES:

a) **SOCIAL DISTANCE:** Throughout the event, compliance with the rule that people are at least ONE METER away from each other should be guaranteed.

b) **AREAS WITH LIMITED ACCESS:** Both the playing field and the track are safe and locked areas, completely closed to the public and / or to any other external interference. The amount of people will be managed within the relevant areas:

- Access to the crew points will be allowed to 4 crew members
- In the stable area, access will be allowed to a maximum of 2 people per horse at any time.

The number of the crew is limited to 2 plus the Athlete for the duration of the event. All the people related to competitions will be identified bib vests or armbands.

c) **SUGGESTED USE OF PPE (Personal Protective Equipment)** in indoor places.

d) **HAND HYGIENE:** provision of hand solutions at the entrance and in various points of the premises, in order to facilitate frequent sanitation by users. Sanitizing gel and alcohol-based disinfectant will be available in the main points of the venue.

The Organizing Committee provides a cleaning service carried out in compliance with the provisions in force for all premises for common use and for those that it makes available exclusively for sporting purposes. All the rooms will be cleaned every day with specific products.

f) **VENTILATION:** Reinforcement of natural air exchange or through mechanized systems in closed environments (by keeping doors and windows open, unless the weather conditions or other situations of necessity do not allow it).

g) **EMERGENCY PLAN:** procedure aimed at the safe management of the case in which a person experiences Covid-19 symptoms. The Italian Red Cross will take care of this management for the entire duration of the event.

IV. THE FEI CODE OF CONDUCT FOR THE WELFARE OF THE HORSE

The Fédération Equestre Internationale (FEI) expects all those involved in international equestrian sport to adhere to the FEI's Code of Conduct and to acknowledge and accept that at all times the welfare of the horse must be paramount and must never be subordinated to competitive or commercial influences.

1. At all stages during the preparation and training of competition horses, welfare must take precedence over all other demands. This includes good horse management, training methods, farriery and tack, and transportation.
2. Horses and competitors must be fit, competent and in good health before they are allowed to compete. This encompasses medication use, surgical procedures that threaten welfare or safety, pregnancy in mares and the misuse of aids.
3. Events must not prejudice horse welfare. This involves paying careful attention to the competition areas, ground surfaces, weather conditions, stabling, site safety and fitness of the horse for onward travel after the event.
4. Every effort must be made to ensure that horses receive proper attention after they have competed and that they are treated humanely when their competition careers are over. This covers proper veterinary care, competition injuries, euthanasia and retirement.
5. The FEI urges all involved with the sport to attain the highest levels of education in their areas of expertise.
